

Antibiotic Stewardship Education

for Long-Term Care Facilities (LTCFs)

The Centers for Medicare & Medicaid Services (CMS) requires nursing homes to implement antibiotic stewardship programs, which are integrated into their infection prevention and control programs. Improving antibiotic prescribing practices and use is critical to effectively treat infections, protect patients from harms caused by unnecessary antibiotic use, and combat antimicrobial resistance.

Continuing Education (CE) Credit available for all live attendees.

HYBRID REGIONAL WORKSHOPS

(in-person or live-virtual)

A complimentary hands-on seminar to help you implement or improve the Antibiotic Stewardship Program (ASP) in your facility.

Each location holds two workshops, one date for each topic listed. All sessions are 8:30am - 12pm CT at the specified location.

Breakfast is provided.

How to Engage Local Health Department and Hospital Sources	4 Mar 2026

ONE-ON-ONE ANTIBIOTIC STEWARDSHIP GUIDANCE

Facilities will benefit from individualized 1:1 mentorship designed to address pressing Antibiotic Stewardship Program (ASP) challenges and improve stewardship practices in Post-Acute LTCFs.

Program Benefits:

- **Individualized Learning:** One-on-one sessions designed to meet your unique needs and challenges.
- **Comprehensive Training:** Covering your choice of key topics such as appropriate antibiotic prescribing, infection control, and resistance prevention.
- **Ongoing Support:** Continuous access to mentors for advice and troubleshooting.

Who Should Join?

All LTCF professionals:

- Administrators
- Nursing staff and infection control practitioners
- Pharmacists
- Healthcare providers
